WORK EXPERIENCE

Ready Set Marketing
May 2022 - March 2023

Junior Full Stack Engineer | London, UK

- Responsible for front-end development using JavaScript and React.
- Deliver high-performance code that is secure, well-documented, and of high quality.
- Ensure code is unit-tested and undergoes regular code review and continuous integration checks.
- Worked on back-end development using Webpack and Django.
- Built the application using Docker Desktop to manage containers and streamline deployment.

AGIL f(x)
January 2022 - May 2022

Bubble.io Developer | New York, NY

- Utilize expertise in low/no code applications to develop web and mobile applications on the Bubble.io platform.
- Integrate business objectives with user experience for client projects.
- Write custom JavaScript and HTML/CSS to add features not possible with Bubble for specific projects.
- Implement Stripe integration for projects that require payment systems.

Counting Coral
June 2021 - December 2021

Web Developer, Intern | New York, NY

- Migrated the Counting Coral website from Wix to WordPress using the Divi framework.
- Redesigned the Counting Coral website through collaboration with the founders, translating their vision into achievable code, and drafting new web pages.
- Designed and maintained a consistent user experience and interactions across multiple devices and platforms, including mobile and responsive web.
- Implemented JavaScript functions for key features on the pages of the main application.
